Mastery properties

Cleave. If you hit a creature with a melee attack roll using this weapon, you can make a melee attack roll with the weapon against a second creature within 5 feet of the first that is also within your reach. On a hit, the second creature takes the weapon's damage, but don't add your ability modifier to that damage unless that modifier is negative. You can make this extra attack only once per turn.
Graze. If your attack roll with this weapon misses a creature, you can deal damage to that creature equal to the ability modifier you used to make the attack roll. This damage is the same type dealt by the weapon, and the damage can be increased only by increasing the ability modifier.
Nick. When you make the extra attack of the Light property, you can make it as part of the Attack action instead of as a Bonus Action. You can make this extra attack only once per turn.
Push. If you hit a creature with this weapon, you can push the creature up to 10 feet straight away from yourself if it is Large or smaller.
Sap. The creature that is hit by this weapon has Disadvantage on its next attack roll before the start of your next turn.
Slow. If you hit a creature with this weapon and deal damage to it, you can reduce its Speed by 10 feet until the start of your next turn. If the creature is hit more than once by weapons that have this property, the Speed reduction doesn't exceed 10 feet.
Topple. If you hit a creature with this weapon, you can force the creature to make a Constitution saving throw (DC 8 plus the ability modifier used to make the attack roll and your Proficiency Bonus). On a failed save, the creature has the Prone condition.
Vex. If you hit a creature with this weapon and deal damage to the creature, you have Advantage on your next attack roll against that creature before the end of your next turn.

Long jump

Move 10+ feet, and jump a number of feet up to your Strength score. When you make a standing Long Jump, you can leap only half that distance. Each foot you jump costs a foot of movement.

High jump

Move 10+ feet and jump a number of feet equal to 3 plus your Strength modifier. When you make a standing High Jump, you can jump only half that distance. Each foot you jump costs a foot of movement.
You can extend your arms half of your height. Thus, you can reach a distance equal to the height of the jump plus 1½ times your height.

Concentration

These factors break your Concentration.

Another Concentration Effect. You lose Concentration on an effect the moment you start casting a spell that requires Concentration or activate another effect that requires Concentration.
Damage. If you take damage, you must succeed on a Constitution saving throw to maintain Concentration. The DC equals 10 or half the damage taken (round down), whichever number is higher, up to a maximum DC of 30.
Incapacitated or Dead. Your Concentration ends if you have the Incapacitated condition or you die.

Tool proficiency

If you have proficiency with a tool, add your **Proficiency Bonus** to any ability check you make that uses the tool. If you have proficiency in a skill that's used with that check (**e.g. Sleight of Hand with Thieves' Tools**), you have ***Advantage*** on the check, too.

Death saving throws

When you start your turn with 0 HP, roll 1d20, and you succeed on a 10+.
Third Success. You become Stable.
Third Failure. You die.
Rolling a 1. Counts as two failures.
Rolling a 20. You regain 1 Hit Point.
If you take damage at 0 HP, it counts as a failed Death Save or two failures if the damage is from a Critical Hit.

Coverage & AC

Coverage	Benefit
Half Cover	+2 bonus to AC and Dexterity saving throws
Three-Quarters Cover	+5 bonus to AC and Dexterity saving throws
Total Cover	can't be targeted directly

If behind more than one degree of cover, a target benefits only from the most protective degree.

Equipping & unequipping during combat

A character can do the following during their turn:
Free Object Interaction. Each character has one free object interaction per turn. Characters can use this to equip/unequip a weapon or item(e.g. sword, staff, wand, bow, etc.) , which includes *picking up/dropping a weapon.*
Action. As part of their action, a character can equip/unequip a weapon or item. *This includes picking up/dropping a weapon.*

In this way, character can unequip a weapon and equip another weapon in their turn. They can only equip/unequip one item (unless they have the **Dual Wielder** feat).

Visibility Outdoors

When traveling outdoors, most characters can see about 2 miles in any direction on a clear day, except where obstructions block their view. That range increases to 40 miles if they are atop a mountain or a tall hill or are otherwise able to look down on the area from a height. Lightly Obscured conditions reduce visibility: rain reduces maximum visibility to 1 mile, and fog reduces it to between 100 and 500 feet.

Visibility Underwater. Visibility underwater depends on water clarity and the available light. Since it is left to DM discretion, I produced the following homebrew rules.

Clear Water, Bright Light: 20 ft
Clear Water, Dim Light: 10 ft
Murky Water, Bright Light: 5 ft
Murky Water, Dim Light: 0 ft

Time in Druskenvald

Period Name	Equivalent Time Range
Twilight Hour	Morning (07-11)
Dusk Hour	Midday (11-15)
Nightfall Hour	Afternoon (15-19)
Evening Hour	Evening (19-23)
Midnight Hour	Late Night (23-03)
Witching Hour	Early Morning (03-07)

Obscured Areas

Obscurement	Effect	Examples
Lightly Obscured	Creatures have ***Disadvantage*** on ***Wisdom (Perception) checks*** that rely on sight	Dim light, patchy fog, moderate foliage
Heavily Obscured	Creatures have the **Blinded** condition	Darkness, heavy fog, dense foliage

Moonlight and Advanced Darkness

Home-brew: Advanced Darkness. However that is during the day. Druskenvald is covered in Moonlight and Darkness. Entering the Evening Hour (7 pm - 11 pm), darkness engulfs the land in a peculiar way. Torches work normally before the Evening Hours, but after the Creeping Dark sets in their range is reduced, and then further by Crooked Darkness. For example a torch only lights 10 feet of Bright light in Crooked Darkness. Creatures with Darkvision succumb to this advanced darkness with a reduction on their visibility range, and have the disadvantages of Dim Light when the darkness creeps forward. For example, a creature with Darkvision up to 60 ft will only see up to 30 ft in Crooked Darkness without a light source, and only see up to 45 ft in Creeping Darkness.

Time	Darkness Name	Ratio	Outdoors	Darkvision
07-19	Moonlit	100%	Dim Light	See normally
19-23	Creeping Dark	75%	Dim Light	Dim Light
23-03	Crooked Dark	50%	Darkness	Darkness
03-07	Creeping Dark	75%	Dim Light	Dim Light

Weather	Unassisted Visibility
Moonlit Clear skies	600 ft Dim Light -> Darkness
Moonlit Rain	240 ft Dim Light -> Darkness
Moonlit Light Fog	120 ft Dim Light -> Darkness
Creeping Dark Clear skies	20 ft Dim Light -> Darkness
Creeping Dark Rain	10 ft Dim Light -> Darkness
Creeping Dark Fog	Darkness
