Crooked moon monster harvesting

Objective

Following the publication of The Crooked Moon I decided to DM it for my friends.

Now in most video games I enjoy monster drops, monster harvesting, or otherwise having an item be part of the story-telling of the world the players are in. I take great inspiration from games like Dark Souls, where item descriptions are how we find out some of the lore of the monsters we just defeated, as well as Tears of the Kingdom, where you can do wacky things with items recovered from monster parts.

Therefore I decided to make items unique to most monsters of the Crooked Moon campaign. That includes some of the official Monster Manual monsters as well, but I did not cover all of them. Now, because a lot of Crooked Moon characters don't really need to eat, I didn't really put all that much thought in cooking effects.

Also to note is that I cannot be bothered with encumbrance rules so unless I am feeling particularly bored and had finished all the monsters, I'm not including item weight in any of the items for the moment.

Use guide

There are (currently) mainly the following fields:

- **Item**: The item name
- **Storage**: Where to store the item once harvested. Usually vials, and I ruled a bottle can be filled with the content of 10 vials. I would assume a flask is about 5 vials. I am not American and can't really be bothered to check what an "ounce" or a "pint" is, so this will have to do. For most other items, I imagine a pouch can fit small items and a bag the larger items. Dust and other items, I wold think a small piece of cloth with a string to tie it will do.
- **Monster(s)**: The name of the monster or monsters that drop the item. I tried making it one item per monster, but sometimes it is thematic that many monsters will have the same drop. Now, when you release the information to the players make sure it doesn't spoil a monster they haven't harvested yet.
- **Item Type**: I am mainly using the following list:
  - Weapons, Armor, Wondrous Items, Relics, Arcana, Implements, etc. (Rarity): Your regular run of the mill DnD item.
  - Consumable (Rarity): A consumable magic item, which often can also be used as an ingredient in crafting magic items.
  - Ingredient (Rarity): An ingredient in crafting potions, casting spells, or crafting magic items
- **Ingredient Type**: In my rules, most consumable items can be used in place of money to craft magic items, while ingredients are specialized items that can also be used in place of the money needed to craft a magic item. If this field lists a type of item, the harvested item can be used as money to craft that item. I often specify like so:
  - Potions (specific potion). If there's no specific potion listed but says Potions, it's an all-purpose magic enhancer that can help the crafting of the potion.
  - Scrolls. Can be used to craft scrolls. I imagine if there is magic inside the item, one can extract that magic and embed it in the scroll. Normally this would cost money for fancy magical inks, but the ingredient can also be used. I wouldn't presume that you need to convert it to ink first, but rather just transfer the magic to the paper.
  - Arrowheads. I made this specifically for items that can be used to enhance ammunition. In these cases, I specify the type of arrow it can craft and how much it would cost, but they can also be used in regular ammunition +1,+2, and so on if the player likes.
  - Arrow Fletchings. Same as the above.
  - Weapons. Similar to the scrolls, the item itself doesn't need to be made of metal, but it can just be a magical catalyst needed for the enchanting of a magical weapon. For example, if you add vampire blood to forge a sword, that doesn't mean it will necessarily be a necrotic sword, vampire blood just has magic in it. But, if you want to make a vampiric sword magic item specific to this ingredient, feel free to do so! I just didn't because there's already the abbot sword.
  - Armor. Same as the above. However, in these cases I often do say how the material can be used in armor crafting.
  - Wondrous Items (Type). Sometimes I will add a specific type of wondrous item, so that the harvested item and the crafted item have some connection at least. Not often though.
  - Spells. You can use the consumable item instead of a costly material component for casting. Doing so consumes the item.
- **Crafting Value**: This is basically the amount of money you can replace in the crafting process with said ingredient or consumable. You can't, however, just take this monetary value and try to sell it. Or at least in my game you can't. This is to give an incentive to players to actually use the nice things i made for them. Crafting is usually cheaper anyways! If you prefer them to be able to sell these, you can, but I caution that the economy would be a bit hard to manage, and your players can get filthy rich super fast.
- **Use**: This is mostly to broadly categorize items in what they can do.
  - Throw: Items you can throw
  - Drink: Items you can drink
  - Crush / Burn / Destroy: The item's effect is only activated when destroyed
  - Absorb: Items you basically drain of their magic energy. Usually these are the most spooky.
  - Sprinkle: Usually dust or fur, items you sprinkle in an area
  - Weapon enchant: You apply the item directly to the weapon and it becomes enchanted for a short amount of time.
  - Armor / Clothes / Shield enchant: You apply the item to yourself, your armor or your shield, and it gives a temporary protective effect.
  - Fire with arrow: You tie this to an ammunition and fire it, activating on a hit
  - Activate: Items that you mostly just...will into working. This might be a command word, or just the intention to use the item will activate the magic.
- **Effect**: What the consumable does
- **Cooking Effect**: What it does if you put it in food. This one is a work in progress.

I won't charge for this content but honestly it is taking me several full on days of designing items. If you'd like to toss a coin to your local Witch I would be grateful.

Spectral slick

Source: Home-brew
Consumable (Common)
Store in: _ vial_

Use: *Weapon enchant, Absorb*
Description: A transparent slick left behind by Specters.
You can use a Bonus Action to apply this to a weapon. When applied to a weapon, add +1d4 Necrotic damage to attacks with that weapon for 1 minute.
Alternatively, you can consume all its necrotic energy to add a +1 to hit or spell save DC to cast a Necromancy spell.

Cooking Effect: When added to food that is cooked thoroughly, up to 4 people can gain a small resistance to Necrotic damage for an hour. When you would take Necrotic damage under this effect, subtract 1 point of damage.

Dark dust

Source: Home-brew
Consumable (Uncommon)
Store in: *vial, cloth*
Use as ingredient for: *Potions, Scrolls, Weapons, Armor, Shields*
Crafting Value (when used as ingredient): *50 GP*
Use: *Throw, Sprinkle*
Description: The Phantom Trainhopper was incorporeal and made of shadows, but however implausible you have found a dark dust left behind after defeating it. When sprinkled or thrown on the floor, magical darkness spreads from it in a 10 ft radius sphere for 1 minute. If sprinkled on an object that isn't worn or carried, the darkness emanates from it and will disappear if covered with something opaque such as a bowl or helm. If any of this item's area overlaps with bright light or dim light created by a spell level 2 or higher, the darkness disappears. If the area overlaps with bright light or dim light from a spell lower than 2, that other spell is dissipated. If a non-monster creature starts within the darkness or enters the darkness on subsequent turns, they must succeed on a DC 13 Wisdom Saving Throw or take 1d6 Psychic damage at the start of each turn spent in the darkness.

Cooking Effect: When added as a spice to food, up to 4 people can become a bit darker for 1 hour. When under this effect, a 1 ft radius around you becomes dim light.

The claws can otherwise be used as 10 GP of the 100 GP needed in crafting Wildpyre Ammunition (Uncommon)(20)

Wildpyre fur

Source: Home-brew
Consumable (Uncommon)
Store in: _ pouch_
Use as ingredient for: *Potions, Scrolls, Armor, Shields, Rods (Fire), Wands (Fire), Staffs (Fire), Rings (Fire), Wondrous Items (fire)*
Crafting Value (when used as ingredient): *50 GP*
Use: *Throw, Sprinkle, Armor enchant*
Description: The phantasmal Wildpyre might be a ghost, but it is still a cat. There is fur on your clothes just from being around it.
When sprinkled or thrown on the floor, a fire that gives out 15 ft Bright Light and 15 ft Dim Light occupying a 10 ft cube appears for 1 minute. Creatures entering the fire or starting their turn there take 1d8 Necrotic and 2d6 Fire damage. After taking the damage for the first time, they make a DC 15 Dexterity Saving Throw, and become restrained if failed.
When sprinkled on armor or shields, it becomes magically covered in flames for 10 minutes, during which 15 ft of Dim Light emanates from the armor or shield, and when an enemy attacks the wearer with a melee attack they take 1d4 Necrotic and 1d6 Fire damage.

Soul coal

Source: Home-brew
Consumable (Uncommon)
Store in: _ pouch_
Use as ingredient for: *Potions, Scrolls, Weapons, Armor, Shields, Rods (Fire), Wands (Fire), Staffs (Fire), Rings (Fire), Wondrous Items (fire)*
Crafting Value (when used as ingredient): *50 GP*
Use: *Weapon enchant, Torch*
Description: Left behind Haints that don't find peace for too long end up becoming Soul Coal.
When applied to a weapon as a Bonus Action, add +1d4 Fire and +1d4 Necrotic damage to attacks with that weapon for 10 minutes, and attacks to incorporeal creatures ignore resistances to Slashing, Bludgeoning and Piercing damage.
If used on the end of a torch, the fuel lasts for 1 hour, it sheds green-blue Bright Light in a 30 ft radius and Dim Light for an additional 30 ft, and incorporeal creatures become corporeal losing resistances to Slashing, Bludgeoning and Piercing damage while illuminated.
You can alternatively crush this item into 5 pieces of Soul Embers using blunt force. If you have proficiency with an Alchemist Kit, you can refine it more carefully into 10 pieces of Soul Embers. The process takes 30 minutes. Any resulting number of Soul Embers will add up to 50 GP when used as material for crafting.

Cooking Effect: When used as fuel in a fire to cook, you can prepare magic food for up to 4 people. When this food is eaten, for the next hour you emit a faint blue-green glow and are surrounded by a 5 ft emanation of Bright Light. Incorporeal creatures in the emanation, whenever they would resist Bludgeoning, Slashing, or Piercing damage because of their being incorporeal, subtract 2 points of damage from the total instead.

Ghostlight grease

Source: Home-brew
Consumable (Rare)
Store in: _ vial_
Use as ingredient for: *Potions, Scrolls, Weapons, Armor, Shields, Rods (Fire), Wands (Fire), Staffs (Fire), Rings (Fire), Wondrous Items (fire)*
Crafting Value (when used as ingredient): *500 GP*
Use: *Weapon enchant, Armor enchant, Torch, Lantern*
Description: The wheels of the Ghostlight Locomotive are lubricated with a ghostly grease that still keeps a bit of its power.
You can use a Bonus Action to apply this to a weapon. When applied to a weapon, add +1d6 Fire and +1d6 Necrotic damage to attacks with that

weapon for 1 hour, and attacks to incorporeal creatures ignore resistances to slashing, bludgeoning or piercing damage. If used on an armor or a shield, it grants resistance to necrotic and fire damage for 1 hour.
When used as fuel for a torch or lantern, it temporarily becoems magical for the duration of the fuel (6 hours). Mixing other fuels does not extend this time, but turning the lantern off can be done to save the remaining fuel for later. In the case of a torch it sheds green-blue Bright Light for 30 ft and Dim Light for 30 ft, or Bright Light in a 50 ft radius and Dim Light for an additional 50 ft for a hooded lantern, or 70 ft cone Bright light and 70 ft Dim Light for a bullseye lantern, and incorporeal creatures illuminated by it become corporeal, losing any resistances to slashing, bludgeoning and piercing damage when affected like this.

Cooking Effect: When used as cooking oil, you can prepare food for up to 4 people. When eaten, for the next 12 hours you emit a faint blue-green glow and are surrounded by a 5 ft emanation of Bright Light. Incorporeal creatures in the emanation become semi-corporeal. Whenever they would resist Bludgeoning, Slashing, or Piercing damage because of their being incorporeal, they instead subtract 2 points of damage from the total.

During this time, target 1 creature that is incorporeal and Undead within 20 feet of you, and that creature will not benefit from Resistance to Piercing, Slashing or Bludgeoning damage from being incorporeal for 1 round. You can instead target one weapon in your possession for 1 round. During this time, the weapon will ignore resistances to Piercing, Slashing, or Bludgeoning damage resulting from a target of the attack being incorporeal and Undead.
